

All Poly Skids are not created equal!

It's true. You can buy other poly skids. But, If you're interested in the long term profitability of your operation, you'll want to get the facts before you spend your hard earned money. Poly Last™ combine skids from Poly Tech are designed to fit better and wear longer than any other poly skid.

The fact that longer wear life is better is simple enough. What most people don't think about is: **Why fit is so important!** The primary purpose of poly skids is to allow your header to ride directly on the ground without sticking or pushing. This allows you to harvest more of your crop, especially the portion growing closest to the ground. The cutter bar reaches it's optimum cutting depth just above the surface of the ground. Very much like a quality razor produces a close shave, you want to eliminate as much stubble as possible.

Other poly skids can fit poorly causing a gap between the poly and the steel. As dirt and trash are trapped, a packing effect begins to push the poly even further away from the steel. The distance between the poly and the steel (as much as 1/2" or more) is what keeps your cutter bar from reaching it's optimum cutting depth.

Poly Last™ skids have a glove fit to eliminate the gaps that cause problems. Your combine head is free to ride the ground and your cutter bar can reach its optimum position next to the ground. Your crop goes where it belongs: in your grain tank and ultimately in your bank account.

Poly Last™ Combine Skids
**FIT BETTER &
WEAR LONGER**

Competitor's Fit - Gap raises
cutter bar and wears quicker.

Poly Tech Fit with
Patented "Living Hinge"
Gets low and wears even.

Cutting close means more beans in the bank!

Does it make sense to pay \$100 or even \$200 less for a "bargain" only to walk across your field after harvest and see thousands of dollars of your crop still lying in the field?

If you harvest a minimum of one extra bushel per acre, which you can sell for \$8.00 per bushel; and you're harvesting 600 acres; Is it worth \$4800.00 to invest a little more in Poly Last™ combine skids?

Use this formula and do your own math. The numbers will be different for everyone. But, the results will always improve your bottom line. **WE GUARANTEE IT!** If not, you have every right to return the product for a full refund or exchange. These are the facts. We don't cut corners to produce a cheaper product. We design and build products that work. If quality matters then you need a Poly Last™ product.
